

Windows XP Support Tools Service Pack 2

Overview

The Windows Support Tools for Microsoft Windows XP are intended for use by Microsoft support personnel and experienced users to assist in diagnosing and resolving computer problems. For individual tool descriptions, see the Windows Support Tools documentation (Suptools.chm).

The Windows Support Tools for Windows XP can be installed only on a computer that is running the Windows XP operating system. The Windows Support Tools for Windows XP cannot be used to upgrade Microsoft Windows NT or Microsoft Windows 2000 Support Tools installed on Windows NT or Windows 2000.

It is highly recommended that you remove all previous versions of Support Tools, including beta versions of the Windows Support Tools for Microsoft Windows XP, before you run the Support Tools installation program.

Important: *These tools have not been localized; they are written and tested only in the English language. Using these tools with a different language version of Microsoft Windows XP may not work.*
